A letter

Dear Dr. McAllister:

As you will see from the enclosed list of my publications, I have been studying the involvement of the p53 protein in the malignant process for a decade now. I have been told that the Council for Tobacco Research administers a program which supports some topics in cancer research, and I am interested in joining that program.

Would you be so kind as to send me information regarding the procedure that I should follow in order to apply for one of your grants.

I look forward to hearing from you at your earliest convenience.

Sincerely yours,

Varda Rotter
Varda Rotter

P.S. Enclosed is my c.v. and list of publications.
